DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Frixon (WO 93/06469).

Figs. 1 & 2 - Device for examining filled containers for foreign bodies - WO 93/06469 to Frixon

4. As per claims 1 and 9-11, Frixon discloses a device (and corresponding method) comprising a transport apparatus (2) for transporting containers (1) individually in succession in a row (see Fig. 1, shown above); at least one X-ray source $(3_1, 3_2)$ for emitting an X-ray $(8_1, 8_2)$ in a predetermined direction, wherein the predetermined direction in inclined by between approximately 10 and 60 degrees to the plane of transport (2); and at least one apparatus for recording $(5_1, 5_2, 7)$ the X-rays $(8_1, 8_2)$ after they have passed through the containers (1).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2-5, 8 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frixon (WO 93/06469).
- 7. As per claims 2 and 13, Frixon discloses a device (and corresponding method) as recited in claim 1, but does not explicitly disclose an apparatus wherein a first source is placed above the plane of transport while the second source is placed below the plane of transport and its X-rays are directed upward towards the plane of transport.
- 8. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Frixon such that it was configured to have a first source placed above the plane of transport while the second source is placed below the plane of transport and its X-rays are directed upward towards the plane of transport. One would have been motivated to make such a modification for the purpose of obtaining views from opposing positions such that the presence of a foreign bodies are identified as a result of source position, as suggested by Frixon (see p.9, lines 33-37; p. 10, lines 1-20).
- 9. As per claims 3-4 and 14, Frixon as modified above, discloses a device (and corresponding method) wherein the at least one apparatus for recording X-rays (5₁, 5₂, 7) is a member of a plurality of apparatuses for recording the X-rays; one of the plurality of apparatuses

Application/Control Number: 10/534,653

Art Unit: 2882

is allocated to each source and the X-rays recorded by the recording apparatuses are compared

Page 4

with one another in an evaluation apparatus (7) - (see p.9, lines 33-37; p. 10, lines 1-20).

10. As per claim 8 and 12, Frixon, as modified above, discloses a device (and corresponding

method) wherein the at least one X-ray source is positioned such that a ray course is

approximately tangential to a maximum slope of a bulge of a bottom of the container (see Figs. 1

& 2 above).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Courtney Thomas whose telephone number is (571) 272-2496.

The examiner can normally be reached on M - F (9 am - 5 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ed Glick can be reached on (571) 272 2490. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
